STRATEGIC OBJECTIVES

Fostering an open, innovative, and trusted Internet worldwide
We are committed to advancing the underlying open and interoperable architecture of the Internet, and its distributed and collaborative means of management and development, as these principles are essential for fostering a stable, open, and trusted Internet upon which innovation can flourish.

Advancing policies and strategies that strengthen the Internet’s growth and evolution
We aim to influence policy makers, civil society, industry, and others to advance Internet policies and strategies that uphold the critical principles of openness, user-centricity, and stakeholder participation.

Enabling a vibrant organisation and vital global community to advance the Internet’s future
We aim to further engage our Members and the public towards positive action, as well as helping a new generation of Internet leaders, contributors, and innovators to emerge.

Empowering people to achieve human potential through unencumbered Internet use
We will aim to advance the access and use of the Internet on an open, nondiscriminatory basis, and empower individuals and communities, including the vulnerable and underserved, to maximise the transformative opportunities the Internet enables.
