Programme Expenditures 2015

**Global Engagement / $10,305,747**
- Regional Bureau Activities
- INET Regional Meetings
- Education and Leadership Programmes
- Technical Capacity Building Programmes
- Internet Society Fellowships to the IETF
- Chapter Development and Support
- Beyond the Net
- Public Policy Makers to the IETF

**Stakeholder Relations / $2,006,778**
- Event Planning
- Organization Member Support
- Individual Members & Donors

**Technology & Standards Development / $9,405,555**
- Standards and Technology
- Development and Operationalization
- Trust and Identity
- IETF Meetings and Activities
- Network & Distributed System Security Symposium

**Global Policy / $3,530,886**
- Public and Member Briefings
- Global and Regional Policy Development
- Internet Policy Outreach
- Engagement with International Organizations
- Internet Governance Coordination

**Management & General / $6,375,156**
- Executive Office
- Finance & Accounting
- Human Resources
- Administration & Office
- Legal & Governance
- Depreciation & Amortization

**Strategic Communications / $3,795,392**
- Corporate Communications
- Publications and Campaigns
- Internet Hall of Fame
- External Communications Programmes
- Communications Platform Development
- Digital Content Strategy and Execution
- Organizational Operational Support (e.g. Design, Print, Translation)
- IETF Communications Support
- Brand & Identity/Website

**Information Technology / $2,027,911**
- IT and Internal Communication
- Network Communications
- Global Conferencing
- Operational activities to support a healthy global organisation
- Three Year Technology Improvement Plan (TYTIP)
- Enhancing technology platforms
- Utilising the Internet for creation, collaboration, and extending ISOC's reach

**Fundraising / $1,603,676**
- Grant Research & Application
- Grant Administration
- Open Internet Endowment
- Organization Member Recruitment
- Postel Service Award
- Individual Donor Cultivation
- IETF Meeting and Host Sponsorships

**Financial Breakdown**

- **Global Engagement**
- **Stakeholder Relations**
- **Technology & Standards Development**
- **Global Policy**
- **Management & General**
- **Strategic Communications**
- **Information Technology**
- **Fundraising**
Nature of Activities and Significant Accounting Policies

Nature of Activities

The Internet Society (ISOC) is a nonprofit organization incorporated on December 11, 1992, to provide leadership in Internet related standards, education, and policy. With offices around the globe, it is dedicated to ensuring the open development, evolution and use of the Internet for the benefit of people throughout the world. ISOC provides leadership in addressing issues that confront the future of the Internet, and is the organizational home for the groups responsible for Internet infrastructure standards, including the Internet Engineering Task Force (IETF) and the Internet Architecture Board (IAB).

On October 3, 2011, ISOC formed Internet Society Asia Limited, a corporation limited by guarantee, located in the Republic of Singapore. This incorporation provides support and visibility to the work ISOC does in the Asia-Pacific region and enhances ISOC’s ability to deliver programs in that region.

Net Assets

Contributions and net assets are classified based on the existence or absence of donor-imposed restrictions. Accordingly, the net assets, and the changes therein, are classified and reported as such:

- **Unrestricted Net Assets** are unrestricted support and revenue received without donor-imposed restrictions. These net assets are available for the operation of ISOC and include both internally designated and undesignated resources.
- **Temporarily Restricted Net Assets** are contributions subject to donor-imposed stipulations that will be met by the actions of the organizations and/or the passage of time. When a restriction is met, temporarily restricted net assets are reclassified to unrestricted net assets and reported in the statements of activities as net assets released from restrictions.
- **Permanently Restricted Net Assets** are contributions subject to donor-imposed restrictions that the net assets remain permanently restricted. The current permanently restricted net asset balances support the future of IETF through the Open Internet Endowment.

Revenue and Support

Membership dues for ISOC are recorded as deferred revenue upon receipt and are recognized as revenue ratably over the period to which the dues relate. Deferred revenue consists of membership dues and conference revenue collected in advance.

The IETF meeting sponsor contributions and attendee registration fees are recognized in the year in which the applicable conference occurs.

All donor-restricted support is reported as an increase in temporarily or permanently restricted net assets, depending on the nature of the restriction. When a restriction expires (that is, when a stipulated time restriction ends or purpose restriction is accomplished), temporarily restricted net assets are reclassified to unrestricted net assets and reported on the consolidated statements of activities as net assets released from restrictions. Restrictions that are met by ISOC in the year in which they were received are recognized as unrestricted support.

Cash and Cash Equivalents

ISOC considers all cash and other highly-liquid investments with initial maturities of three months or less to be cash equivalents.
Related Party Transaction

PIR is the registry for the .ORG top-level domain pursuant to an agreement with the Internet Corporation for Assigned Names and Numbers (ICANN). As a registry, PIR maintains a master directory for all domain names in the .ORG top-level domain. The mission of PIR is to manage the .ORG domain in a way that supports the continuing evolution of the Internet as a research, education and communications infrastructure, and to educate and empower the non-commercial community to most effectively utilize the Internet. PIR charges Registrars a fee per registration-year for registration services provided.

The Internet Engineering Task Force (IETF) is a large, international community of network designers, operators, and researchers responsible for developing and defining the standards and protocols that makes up the Internet. ISOC has been the operational home of the IETF since ISOC’s inception; however, the Secretariat function and some of the administrative duties were performed by other organizations. In early 2005, as part of a long-term restructuring plan, the IETF decided to create an IETF Administrative Support Activity (IASA), to replace the other organizations and formally structure their administrative support functions within ISOC. To complete the restructuring process, on December 15, 2005, the IETF Trust was formed to hold the intellectual property rights associated with the IETF’s standards process. ISOC hosts meetings on behalf of the IETF. The revenue and expenses related to these meetings and the IASA functions are reflected on the consolidated statements of activities.

Lease Commitments

ISOC has a lease agreement for its Reston, Virginia office. The lease originally commenced on June 23, 2001, and has been amended and extended to include 30,037 square feet of space shared by ISOC and Public Interest Registry. The lease now expires in two parts with 19,665 square feet expiring in June 30, 2018 and 10,372 square feet expiring in September 30, 2020.

In February 2009, ISOC entered into a five-year office lease agreement for its Geneva, Switzerland office which ended December 31, 2013, and was renewed for five years ending December 31, 2018.

Temporarily Restricted Net Assets

Temporarily restricted net assets at December 31, consist of the following:

<table>
<thead>
<tr>
