Individual Members — 65,000+ and Growing

Everyone is welcome to be an Internet Society Member! Individual Members around the world are key to providing the Internet with global perspectives and reach, shaping our vision that “the Internet is for everyone.” Individual Members are integral to the Internet Society’s efforts to ensure the Internet remains an open and trusted platform for expression and innovation. Individual membership rose significantly in 2013, indicating broader engagement in issues key to the Internet’s continued development. Moreover, Social Media Supporters grew to over 200,000.

Chapters — Connected Communities Around the World

Our 100 active Chapters around the world make important connections between global issues and local, regional, and topical Internet priorities. Chapters function as independent and vibrant engines for advancing an open and accessible Internet in their communities, energizing Members and working with businesses, government agencies, and civil society groups. Collectively, they operate as part of a dynamic and interdependent network, sharing expertise and collaborating on projects to maximize the impact of their work. In 2013, we welcomed 10 new Chapters, including our 100th in Paraguay and our newest group in Yemen.

Organization Members — Leaders for Preservation and Positive Change

Internet Society Organization Members — more than 150 businesses and nonprofit organizations — engage with other stakeholders worldwide to ensure the Internet remains an accessible and secure platform for creativity, economic opportunity, and growth. Through support for programmes, events, and other activities, Organization Members benefit uniquely from access to technical, economic, and policy-making venues and influence on critical issues. Through participation in the Advisory Council, Organization Members have meaningful impact on the development and evolution of work across the Internet Society’s strategic initiatives.
Donors are a key part of the Internet Society’s vital community of supporters. As a result of their contributions, advances have been made in Internet security and resilience, with increases in regional connectivity and global outreach, fellowship and educational opportunities, and a growing number of projects bringing Internet access to local communities. These achievements are concrete examples of the impact donors can have in supporting our mission to ensure the Internet is for Everyone.

The Internet Society gratefully acknowledges and honors these corporations, organizations, and individuals for their generosity in 2013. If your name has been inadvertently omitted or incorrectly spelled, please accept the Internet Society’s sincere apologies and contact us at partnerdev@isoc.org so we may correct your record.
