Chapter Development

Africa in a nutshell

Large, Young, Fragmented and Diverse

- Its area is 3.1 times China or the US
- 1.2 Billion (was only 221 million in 1950!)
- Half of the population under 25 years
- 54/55 countries
- Official languages
 - French, English, Arabic, Portuguese, Spanish, Amharic, etc.
 - More than 2000 languages

The True Size of Africa

A small contribution in the fight against rampant *Immappancy*, by Kai Krause

Graphic layout for visualization only (some countries are cut and rotated)
But the conclusions are very accurate: refer to table below for exact data

COUNTRY	AREA x 1000 km ²
China	9.597
USA	9.629
India	3.287
Mexico	1.964
Peru	1.285
France	633
Spain	506
Papua New Guinea	462
Sweden	441
Japan	378
Germany	357
Norway	324
Italy	301
New Zealand	270
United Kingdom	243
Nepal	147
Bangladesh	144
Greece	132
TOTAL	30.102
AFRICA	30.221

In addition to the well known social issues of *illiteracy* and *innumeracy*, there also should be such a concept as "*immappancy*", meaning *insufficient geographical knowledge*.

A survey with random American schoolkids let them guess the population and land area of their country. Not entirely unexpected, but still rather unsettling, the majority chose "*1-2 billion*" and "*largest in the world*", respectively.

Even with Asian and European college students, geographical estimates were often off by factors of 2-3. This is partly due to the highly distorted nature of the predominantly used mapping projections (such as *Mercator*).

A particularly extreme example is the worldwide misjudgement of the true size of *Africa*. This single image tries to embody the massive scale, which is larger than the *USA*, *China*, *India*, *Japan* and *all of Europe*..... combined!

IXPs in Africa

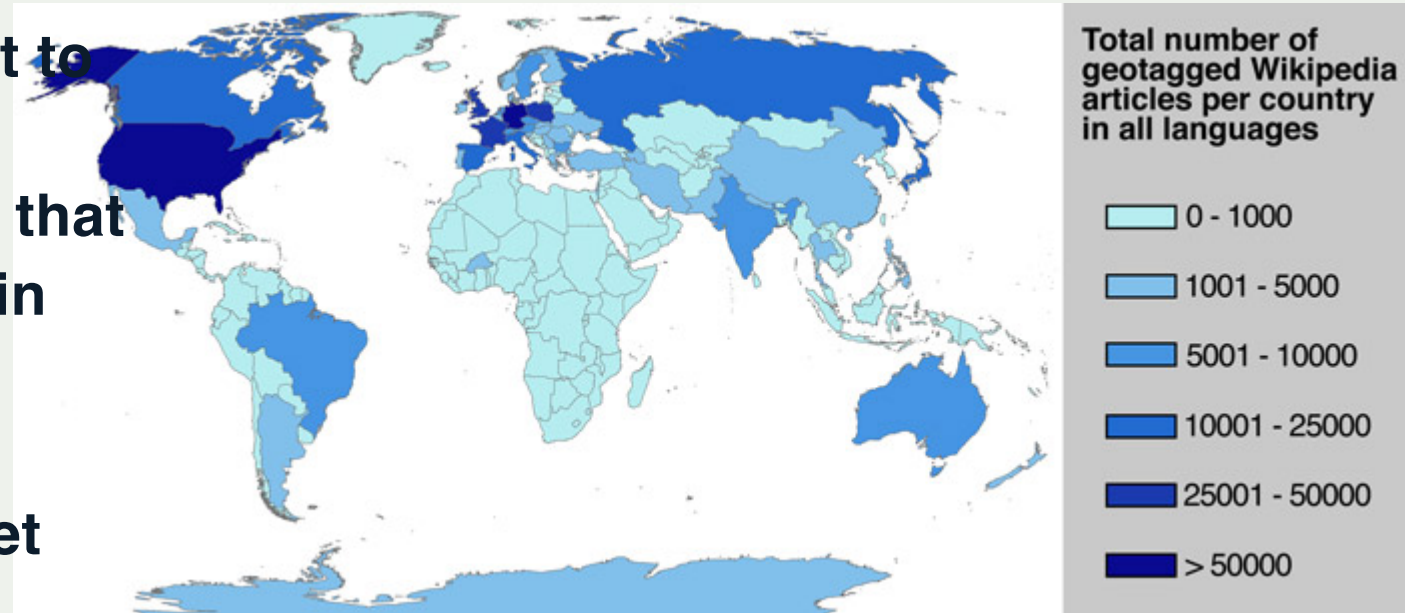

Policy environment

African Internet Policy Issues

Access

- **Increasing interest of government to improve access**
- **Liberalized Telecom environment that brought competition and growth in the sector**
- **Some countries with government control of the telecom and Internet sector**
- **Major concerns with regards to local Wikipedia article authors location content in local languages**
 - 2.75% of the web pages targeting the African population use

African Internet Policy Issues

Trust

- **Cybersecurity is at the top of African ICT policy makers concerns (AU/ISOC survey)**
- **African Union Convention on Cyber Security and Personal Data Protection**
- **30/54 countries do not have cybercrime laws**
- **Internet restriction is being used to limit access**

Internet Society's achievements in Africa

**Most trusted, impactful and influential
Internet organization**

The most impactful organization in building tech. capacity

- Early INET workshops formed the pioneers in Africa
- 1,735 trained directly by ISOC
 - 381 Face to Face (since 2012)
 - 1,354 Online (since 2016)
- 1,485 trained through AFNOG
- 103 trained through AFCHIX
- 450 trained through AFTLD
- 1,169 through NOGs

Changed The Interconnection Landscape in Africa

- Peering increased 409 times from 2009 to 2017!!!
- 460 Gbps exchanged in April 2017
- Interconnection
 - More than 30 countries
 - 7 AFPIFs
 - Leveling up of IXPs
 - African IXP association
- Development of Community Networks since 2016

AFPIF 2016, Dar es Salaam, Tanzania

Working to build Trust

- Amends:
None

1. Summary of the problem being addressed by this proposal

Over the last few years we have seen more and more governments shutting down the free and open access to the internet in order to push political and other agendas. These shutdowns have been shown to cause economic damage and hurt the citizens of the affected countries.

Furthermore – we believe that the Internet is a human right – and the shutting down of the Internet may well impinge on aspects of Articles 12, 19 and 20 of the Universal Declaration of Human rights as proclaimed by the United Nations General Assembly in Paris on the 10th of December 1948.

2. Summary of how this proposal addresses the problem

While the authors of this policy acknowledge that what is proposed is draconian in nature, we feel that the time has come for action to be taken, rather than just bland statements that have shown to have little or no effect.

3. Proposal

The policy proposal will modify the CPM as follows:

• Add the following to "CPM 2.0 – General Definitions":

Internet Infrastructure Security Guidelines for Africa

A joint initiative of the Internet Society and the Commission of the African Union

1 June 2017

Making Internet Meaningful

- Africa – Regional Internet Development Dialogue

Launch of Internet and Education Study

RIDD, Kigali, May 2017

- Internet and education for Africa study

Build communities

- 31 Chapters
- Close to 21,000 members
- NOG community
- IXP community
- CN community
- Organizational members

Chapters advocacy meeting 2017

Internet Society's activities in Africa

2017 work plan

Strategic directions of the African Regional

Bureau

Access

- Changing the Interconnection landscape
- Bringing access to remote communities
- Meaningful access

Trust

- Implementation of collaborative security and trust framework
- Addressing the problem of shutdowns/restrictions
- Partnerships (African Union, Access now, etc.)

IETF

- Increase Africans participation in IETF

2017 activities

Access

- **Deploying Ubiquitous & Trusted Infrastructure**
 - Interconnection and measurements
 - Community Networks in Africa
 - DNS Forum & ccTLD capacity building activities
- **Develop Capacity of Communities**
 - Supporting NOGs & Women Capacity Development
 - BCOP activities in partnership with AfriNIC
 - ION event during iWeek/SafNOG
- **Empower Communities & Sustain Development**
 - Publication: Promoting Internet and Education in Africa
 - Publication: Promoting an African Internet Economy
- **Promotion of Policies**
 - Africa edition of Regional Internet Development Dialogue (RIDDD)

2017 activities ...

- **Trust**
 - **Promote the African Internet Security Infrastructure Guidelines' implementation**
 - **Develop the African Personal Data Protection Guidelines**
 - **Develop an Anti-shutdown strategy**
- **Communications**
 - **Create relevant content and develop communication platforms**
 - **Implement and promote new ISOC Brand and Identity**
 - **Support and implement global communication campaigns in the region- Access and Trust**

ISOC Chapters in Africa

31 Chapters / 20'883 members

16 English Speaking Chapters

15 French Speaking Chapters

Oldest Chapter: Morocco (1996)

Youngest Chapter: Tanzania (2015)

African community projects

Some facts & figures

- Community grants programme: 53 from Africa (Global total: 187)
- Beyond the net (as of 2015): 7 from Africa (Global total: 28)
- Small Grants (as of 2015): 12 from Africa (Global total: 49)

Creating local content on wikipedia, Uganda

Zenzeleni Community Network, South Africa

IoT training, Zimbabwe

Building and strengthening chapters

- Chapter advocacy workshops
- Involving chapters in at least 30% of bureau activities
- Chapters represent ISOC in regional and national meetings
- Staff members meet with chapters
- Online trainings for chapters
- Providing tools (Zoom, Livestream, etc.)

Chapters workshop, Dakar, Senegal, 2014

IETF Africa- An overview and 2017 Action plan

IETF Africa Initiative - increase Africans' participation in IETF through various activities

Where we are with the initiative

- Active mailing list formed (ietf_africa – 200+ people)
- Various events in Africa (IETF BoF, Events by various Chapters, AFRINIC meeting, IETF material within ISOC Technical online course)

2017 Action plan

- Viewing hubs for IETF 99 in Prague
- Webinars (raise awareness)
- IETF Hackathons (identify skilled individuals)
- Meetings at at least two IETF meetings this year
- Identify regional champions
- IETF materials in Universities and NRENs
- Produce short IETF materials for the region

Hackathon@AIS, Nairobi, 2017

Partnerships

Why are partnerships important to the ARB?

- We are a small team with a big region to cover. Partnering internally and externally enable the ARB to reach its goals
- Sharing costs, sharing knowledge and resources
- We are not alone in Africa with similar goals and a similar audience
- Partnering allows us to work with organizations, companies, friends/colleagues with similar objectives, avoid overlap and or avoid “turf issues”

Some organizations we work with

Projects with our partners

- **ISPs and IXPs**
 - *AfPIF workshops*
 - *Routing eg MANRS*
- **ICANN and AFTLD**
 - *Africa DNS Forum*
 - *ccTLD and DNS projects*
- **AFRINIC**
 - *IETF projects and increasing awareness on IPv6*

Our Partners – Capacity Building

NOGs and NRENs

- Aggregating trainees for face to face and online trainings
- IETF awareness
- Women engineers
