October 2012

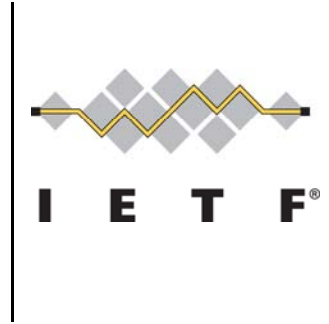

TRUST REPORT

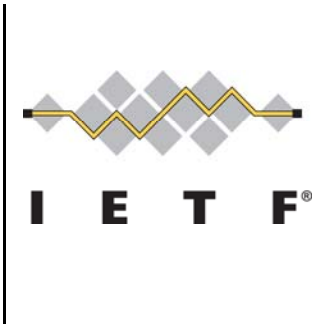

- The Trust grants licenses to RFCs for 3rd parties to copy, publish, display, translate and distribute RFCs, but not to modify them.
- Recently the Trust granted a license in one RFC to make derivative works of the technical content with language used in the RFC.
- This was done at the request of the authors and is not expected to happen frequently.

TRUST REPORT

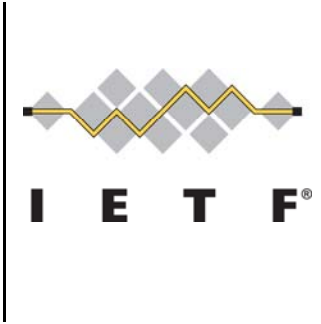

- Thank You!

IETF Trust Request: Incorporate 3rd Party Modifications into RFC

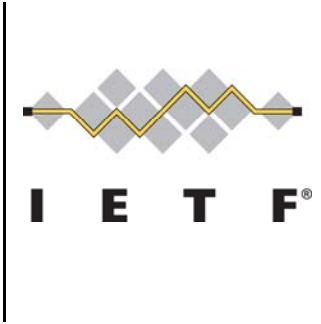

- **ISSUE:** Authors <draft-ietf-codec-opus-16> want people to be able to incorporate all of their technical content, both Code Components and other text, into software, and then to modify it.
- **PROBLEM:** Authors retain the right to license their own Contributions, but not the completed, formatted RFC document. Only the Trust holds the copyright in the RFC, and only the Trust can license the RFC. However, the normal license granted by the Trust for non-IETF use under Section 3.c of the Trust Legal Provisions does not allow derivative works.

IETF Trust Request: Incorporate 3rd Party Modifications into RFC

- **SOLUTION:** The Trust grants derivative rights by placing a Trust-granted derivative license directly in the RFC
- **LANGUAGE:** The licenses granted by the IETF Trust to this RFC under Section 3.c of the Trust Legal Provisions shall also include the right to extract text from Sections 1 through 8 and Appendix A and Appendix B of this RFC and create derivative works from these extracts, and to copy, publish, display and distribute such derivative works in any medium and for any purpose, provided that no such derivative work shall be presented, displayed or published in a manner that states or implies that it is part of this RFC or any other IETF Document.

What is the IETF Trust ?

- The IETF Trust was founded by CNRI and the Internet Society (AKA the Settlers).
 - <http://iaoc.ietf.org/docs/IETF-Trust-Agreement-Executed-12-15-05.pdf>
 - Also see BCP 78 / RFC 5378.
- It exists to hold intellectual and other property of the IETF “for the advancement of the science and technology associated with the Internet and related technology.”
- It has a legal existence as a Trust in the Commonwealth of Virginia.
- There are 9 Trustees, the members of the IAOC.
- The Trustees have a fiduciary duty to protect the IETF’s property!

The IETF Trust Legal Provisions

- The IETF Trust is currently operating under Trust Legal Provisions (TLP) 4.0.
 - Effective Date: December 15, 2009
- These can be found at
<http://trustee.ietf.org/docs/IETF-Trust-License-Policy.pdf>
