

# 2019 Indigenous Connectivity Summit Policy and Advocacy Training

The Indigenous Connectivity Summits (ICS) help find and support solutions for connecting North American Indigenous communities to the Internet. These community-led events are a forum for sharing success stories of Indigenous community networks in Canada, the United States, and around the globe.

At the 2019 ICS participants will have the chance to take part in a six-week, pre-Summit course on **Policy and Advocacy**.

The Policy and Advocacy Training will include:

- **Setting the Stage:** how you can have an impact
- **Becoming an Advocate:** what does it mean and who/what are your resources
- **Community Consultations:** what is the role of the community and who are your allies
- **Role of Existing Rules and Policies:** what are your rights and examples of success
- **Community Networks and Spectrum:** what are they and why do they matter
- **Security of Networks and Applications:** how they impact your community

Learn how to make your voice heard from successful advocates in Canada and the US while creating connections with a new network of passionate connectivity changemakers.
