project instruction (manual)

Location: Five schools in the Capital Sana'a

Time: 1-10 - 15-10

The number of the target group is 30 male and female students.

The aim of the event: Promoting the concept of digital awareness in schools in light of the Corona pandemic and how distance learning is concerned.

Before the event: A field visit was made and official notes were prepared from the Internet Society to the targeted schools.

Coordination with the schools, setting the days of the activities, communicating with the project team and informing them of the start of the equipment and coordination with the management of the association regarding financial matters.

Initiation stage:

We contacted the team to meet and assign tasks. Training materials, necessary forms and assistance were prepared and we contacted the schools for the purpose of nominating the names of distinguished and distinguished students in order to participate in the project so that the level of training for them is distinguished and these students train other colleagues for them.

The first stage:

It was taken to the Hebron School for Boys and Girls and the Tehama School for Boys and Girls, where the project team undertook

In coordination with the event, by preparing banners and stands and distributing booklets with stationery for male and female students, where the trainer and coach of the event made a simplified promotion about Internet privacy and digital education in light of the Corona pandemic and how to properly benefit from the Internet

The event ended with the distribution of breakfast for students and teachers and thanked them for that. An interview was conducted after the break with a number of students to find out their previous background about the Internet and its use, and to clarify the extent of their benefit from the event.

The second stage:

the modern school of excellence was taken to the school of excellence and coordinated with them before the event and approval was obtained, as the project team coordinated the event by preparing the banners and stands and distributing booklets with stationery for students and students. Photography of the event. Photography

At the end of the event, breakfast was distributed to male and female students and teachers, and interviews were conducted with male and female students, and some questions were posed to measure the extent of their benefit from the event, what are their needs and future expectations about the Internet.

On the same day, a short event was held at the Modern Science University, where students were gathered from different schools in the great hall of the university in the presence of

the Dean of the University, the Secretary General and some teachers, and a simple promo was made about the Internet Society and the definition of its activities in Yemen.

The Dean of the University expressed his admiration for the programs offered by the Internet Society and requested that a full event be held for their university students. During the event, filming and video documentation were made, and interviews were made with students and teachers, and at the end of the event, breakfast was distributed.

Attached is a list of the names of the male and female students
