

# 2023 Training and e-Learning Course Calendar

[Enroll in Courses](#)

## Moderated Courses

These courses are offered through the platform with the support of a moderator and a tutor. The moderator ensures all administrative issues are addressed and the tutor provides the technical expertise and answers all questions related to the subject matter.

In a moderated course, the moderator and the tutor meet with the registered learners in a live session for one hour per week for the duration of the course.

One or two modules are released each week and a course has a set time of four to six weeks for completion.

### Introduction to Network Operations

- 16 January–10 February
- 13 March–7 April
- 8 May–2 June
- 19 June–14 July
- 11 September–6 October

## Self-Paced Courses

Self-paced courses are offered through the LMS without a moderator or a tutor. The learner is free to take the courses in their own time and at their own pace.

### Privacy

### Internet Security

### What the Internet Needs to Thrive

### Internet Exchange Point (IXP) 2.0

### Internet Society Chapter Management Essentials

### Digital Footprints

### How to Write an Internet Impact Brief

### What the Internet Needs to Exist

### Grant Application and Project Implementation Guidance

## Tracks

In 2023, the Internet Society will recognize learners have acquired knowledge and skills by taking more than one course in an area of specialization. They will be issued a certificate that covers a track of courses.

### Introduction to Internet Networking Tools

This certification is for those who have completed:

- Fundamentals of Designing and Deploying Computer Networks
- Introduction to Network Operations
- Advanced Network Operations
- IPV6

### Online Safety

This certification is for those who have completed:

- Digital Footprints
- Privacy
- Encryption
- Internet Security

### Internet Tools for Advocacy and Policy for Government Officers

This certification is for those who have completed:

- What the Internet Needs to Exist
- What the Internet Needs to Thrive
- How to Write an Internet Impact Brief
- Encryption
- Internet Governance

 **Tracks Continued...****Defend the Internet Champions**

This certification is for those who have completed:

- What the Internet Needs to Exist
- What the Internet Needs to Thrive
- How to Write an Internet Impact Brief
- Encryption
- Digital Footprints
- Privacy
- Fundamentals of Designing and Deploying Computer Networks

**Government Track-Internet Policy and Advocacy Professional**

This certification is for those who have completed:

- What the Internet Needs to Thrive
- How to Write an Internet Impact Brief
- Government Encryption
- Internet Governance
