Internet Society Learning

2026 Training and e-Learning Course Calendar

Enroll in Courses

Moderated Courses

These courses are offered through the Learning @ Internet Society online platform, supported by a moderator and a tutor. The moderator ensures all administrative issues are addressed, and the tutor provides the technical expertise and answers all questions related to the subject matter.

In a moderated course, the moderator and tutor meet with registered learners in a live session for at least one hour per week, throughout the course duration.

One or two modules are released each week, and a course typically takes four to six weeks to complete.

Fundamentals of Designing and Deploying Computer Networks

Cycle 1.....2 February–15 March

Cycle 2 ....20 July–30 August

Cycle 3.....12 October–22 November

Community Networks Readiness Assessment

Cycle 1.....2 February–15 March

Cycle 2 ....20 July–30 August

Privacy

Encryption

Open and Trustworthy Internet Courses

What the Internet Needs to Exist

What the Internet Needs to Thrive

How to Write an Internet Impact Brief

Mutually Agreed Norms for Routing Security

Internet Security

Community and Partner Mobilization Courses

Internet Society Chapter Management Essentials

Grant and Implementation Guidelines

Tracks

In 2026, the Internet Society will recognize learners who have acquired knowledge and skills by completing more than one course in a specialized area. When learners successfully complete a track, they earn a certificate of completion and qualify to join our alumni network.

Community Centered Connectivity Technicians

This certificate is for those who have completed:

- Fundamentals of Designing and Deploying Computer Networks
- Community network and Readiness Assessment
- Building Wireless Community Networks

Network Operations Support Specialist

This certificate is for those who have completed:

- Introduction to Network Operations
- Advanced Network Operations
- IPv6 (Offered by APNIC)

Affordable and Reliable Access Specialist

This certificate is for those who have completed:

- Introduction to Network Operations
- Advanced Network Operations
- Internet Exchange Point (IXP)

Online Trust & Safety Specialist

This certificate is for those who have completed:

- Introduction to Online Safety
- Encryption
- Digital Footprint
- Privacy
- Internet Security

Tracks Continued...

Internet Policy and Advocacy Champion

This certificate is for those who have completed:

- Encryption
- Digital Footprint
- Privacy
- Internet Security

(Government Track) Internet Policy and Advocacy Champion

This certificate is for those who have completed:

- Encryption
- Digital Footprint
- Privacy
- Internet Security
